

SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8804

SESSION NUMBER: 2

DATE OF SESSION: 29 AUG88

DATE OF REPORT:

START: 1313

END: 1353

METHODOLOGY: CRV

VIEWER IDENTIFIER: 018

SG1A

1. (S/NF/SK) MISSION: DETERMINE THE PURPOSE/FUNCTION OF THE TARGET
[REDACTED] LOCATED AT COORDINATE 557803/870630.

2. (S/NF/SK) VIEWER TASKING: DESCRIBE THE PURPOSE/FUNCTION OF "PANELS"
AND THE "BACK AND FORTH ENERGY" FROM LAST SESSION (15 AUG 88)

3. (S/NF/SK) COMMENTS:

4. (S/NF/SK) EVALUATION: OVERALL IMPRESSION OF MANIPULATING AND REGULATING
ELECTRICAL POWER.

THERE ARE ALSO "BLOCKS" OF ENERGY EMITTING FROM A
FIXED POINT.

HANDLE VIA SKEET CHANNELS ONLY

UNITED STATES GOVERNMENT

memorandum

DATE: 29 August, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J

TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:	Viewer:	018
	Session date:	29 AUG 88
	Start time:	1313
	End time:	1353
	Mode of operation:	CRV
	PI:	None
	AV:	None

2. (S-SS) Cuing:

- a. Describe the "panels" from the last session (see 3.a through 3.c, below).
- b. Describe the "back and forth energy" from the last session (see 3.d, below).

3. (S-SS) Results:

a. The panels appear to be on one wall of a small room which is off a larger room. There are desks, chairs, etc. around the middle of the room. (see sketch, page 1).

b. There were strong impressions that the panels act as a type of power network grid (that is, a controller which regulates and manipulates the electrical power to many places, keeping the power needs to all satisfied as well as possible). These panels have direct lines, relay-controlled lines, etc. (see path sketch, page 8). There is strong evidence that these panels contain electric circuits, rather than electronic.

c. The panels look clean and almost brand new, but they have all the earmarks of being "old-style". That is, they have black wrinkle-finish paint, large knobs, large round panel lights, etc.

d. The "back and forth energy" from the last session was further perceived as "blocks" of energy emitting from a fixed point in irregular patterns of block length and time. Up close, the blocks appear to be light green back and forth lines packed very tightly within a slightly darker green background.
